Craig-

I don't envy your position in this. In crafting a response to Dan, I would highlight the fact that this upcoming meeting is a community coordination meeting where the community will have the opportunity to vet their concerns. And, ACME through Christina Walsh has been coordinated with on this every step of the way.

1. How was the TASC consultant for SSFL selected?

E^2 was awarded the contract to the TASC program through an open competition. As the prime contractors to the TASC contract when a request comes from the community, they are ones who initiate the assistance. If needs exist outside the expertise of the body of employees at E^2, they can subcontract to a more specialized professional. In terms of SSFL issues, I have forwarded Carl Paladino's list of criteria for a suitable consultant. Without much interaction with the community to this point, E^2 cannot determine if they will need to bring in external resources.

2. Is there more than one TASC consultant available to R9?

No. See above. And this goes Nation-wide.

3. What are the resumes of the individuals to be assigned to SSFL? Can these resumes be reviewed in advance?

I don't really see any problem with this, I would rather that this come up at the community coordination meeting. Ultimately, the EPA decides who is qualified to address the technical issues - so Craig, I will rely on you for this determination if Dan decides that no-one is qualified.

4. Has this consultant and individuals been screened for conflict of interest with Boeing and DOE?

To the best of my knowledge this has not been addressed. Again, I would ask that this concern be elevated at the community coordination meeting.

Let me know if you would like to discuss further.

-Luis

Subject: TASC

David and Luis -

Dan H received the EPA Fact Sheet concerning the TASC Consultant. Dan is very upset and concerned about this Program and the lack of coordination with the community concerning screening consultants and explanation of what is going on. He says that ACME has not been properly coordinated with on this.

Primarily he is concerned that the EPA consultant will be:

- not technically qualified,
- pro-Nuc,
- of use to Chris Rowe's group only;
- and/or have a conflict of interest due to prior work with Boeing or DOE.

Here are his questions:

1. How was the TASC consultant for SSFL selected?
2. Is there more than one TASC consultant available to R9?
3. What are the resumes of the individuals to be assigned to SSFL? Can these resumes be reviewed in advance?
4. Has this consultant and individuals been screened for conflict of interest with Boeing and DOE?

I think his concerns and questions are fair and we should get back to him as soon as possible. Please email me back and I will let Dan know the answers to his questions.

Thanks,
Craig
